

# HOSMARTAI

AI for the smart hospital of the future

## Social Robots as enablers of patient-centered care

HosmartAI external stakeholder workshop  
Best, 24 November 2022

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101016834

1. For high quality and patient-centered care
2. Simplify routine and administrative work
3. Prevent unnecessary interruptions and mistakes

## **Respond to chronic shortage**

Give the staff time to engage with patients  
Give the staff energy to carry out high quality nursing

Prevent nurses to ,pay' for the majority of  
value-based healthcare

**Value-based healthcare can start in the hospital**

**Nurses do not have 4 legs and doctors do not have 3 hands**

1. Engage with patients
2. Motivate patients
3. Collect and Digitize the Data
4. Visualize the Data on Demand
5. Automate and personalize the care workflow
6. Full accountability with blockchain

# Is it Worth it?

Estimated cost: 60k-100k + 25k per robotic unit

## Happy patients

A digital health solution for structured health data  
in a standardized format

### integrated solution

Language support for main stream and non-mainstream languages (up to 10k € for speech resources)

A decentralized solution at your premises

**Fully customizable and scriptable product easily adjustable to multiple departments**

## AI in healthcare
